RAMAN R

PROFILE SUMMARY

- PLM Developer and CAD Customization Engineer with 4.5+ years of experience in 3DEXPERIENCE and CATIA V5 customization for automotive product development programs.
- Expertise in EKL scripting, Visual Scripting, CAA RADE (C++), VB.NET, VBA, and engineering automation solutions.
- Skilled in developing PLM actions, design validation checks, CAD automation tools, and rule-based compliance workflows.
- Hands-on experience in Agile development, including sprint planning, reviews, retrospectives, and daily stand-ups.
- Provided mentoring and technical support to junior engineers, guiding them in EKL scripting, CAA development, and automation best practices.
- Strong background in debugging, root cause analysis, and delivering technical solutions to cross-functional teams.
- Experienced in client interaction, demonstrations, and query resolution, ensuring smooth collaboration and knowledge transfer.
- Delivered enterprise-level engineering solutions for global OEMs including Renault, improving design quality and reducing manual effort.

TECHNICAL SKILLS

PLM Technologies

- 3DEXPERIENCE
- CATIA V5
- PLM Customization
- Engineering Automation

Programming & Development

- EKL
- Visual Scripting
- CAA RADE (C++)
- VB.Net
- VB Script
- VBA
- JAVA (Basic)

Tools

- Visual Studio
- Microsoft Excel Automation
- CATIA Automation APIs
- Jira
- Git

PROJECTS

- Rules Checks and Compliance – RCC

  To ensure that all components, assemblies, and vehicle systems are verified against required design rules, validated through checks, and comply with internal and external standards, namely

  1. Connectors Zone Check:
  Verify all electrical connectors are above water level and safe from ground contact.
  2. Air Vent Position:
  Check if air vents are correctly placed for driver and passenger comfort.
  3. Manikin Leg Comfort:
  Ensure manikin legs do not clash with surrounding vehicle component

  Technology used: 3D Experience, EKL, Visual scripting

- Smart CVT Tool

  Smart CVT application tool helps to create the CVT tube according to the standard defined. This tool standardizes the procedure of creating the CVT tube and thus preventing human errors.

  Technology used: CATIA V5 R30, CAA RADE, C++, Vb.net

- Tube Chart macro

  The tube chart macro is used to provide the pants and engineering with the tube's theoretical bend points (XYZ), point name, number, bend radius, end form, segment length and total overall length.

  Technology used: CATIA V5 R30, Vb script, Vb.net

- Hole Chart

  Tools which create identify the hole present in the active document and measure the hole dimension as well as define the hole type according to the geometry and generate a report.

  According to the client error feedback on this tool, Fixed the issue and more over enhanced the tool accuracy and performance.

  Technology used: CATIA V5 R30, CAA RADE, C++, Vb.net

- 2D Grid Tool

  2D Grid tool which creates a grid in the selected view of a drawing document. Grid will be created according to the diagonal points as the user selected in the view.

  Technology used: CATIA V5 R30, Vb.net

PROFESSIONAL EXPERIENCE

PLM Developer – 3DEXPERIENCE

SEGULA TECHNOLOGIES Chennai

Summary

- Working under SEGULA TECHNOLOGIES for RENAULT GROUP INDIA
- Worked in an Agile development environment, participating in sprint planning, daily stand-up meetings, sprint reviews and retrospective sessions
- Used Jira sprint boards to plan, track, and deliver PLM customization tasks, ensuring clear visibility of progress and accountability across the team
- Developed and maintained PLM Actions using EKL and Visual Scripting within the 3DEXPERIENCE platform
- Automated engineering design validation processes through rule-based checks and compliance verification workflows
- Created design verification logic for vehicle components to improve design quality and reduce manual review effort
- Tracked development activities, bugs and enhancements through agile project management processes
- Client interaction that includes showing actions demo and query clearance to the team regarding the checks
- Performed debugging, root cause analysis, and production support for deployed PLM solutions
- Worked with cross-functional teams to enhance engineering productivity through process automation and standardization
- Assisted team members in resolving technical issues with EKL scripting and PLM Actions, ensuring faster problem resolution.

CATIA Solution Developer

TATA TECHNOLOGIES Bangalore

Summary

- Developed CATIA V5 customization applications using CAA RADE and C++
- Designed and implemented automation interfaces for integration with VB.NET applications
- Developed engineering productivity tools to automate repetitive design activities and reduce manual effort
- Participated in application debugging, enhancement, testing, and deployment activities
- Interacted directly with clients for requirement clarification, demonstrations, and issue resolution
- Contributed to improving application performance and user experience through continuous enhancements
- Guided colleagues in debugging and customization tasks, helping them overcome technical roadblocks

CATIA VB CAA Developer

VEGA INTELLISOFT Bangalore

Summary

- Working under VEGA INTELLISOFT for TATA TECHNOLOGIES
- Developing application using CAA RADE that support and automate work of CATIA designers
- Developing Automation interfaces in CAA and exposing them to Vb.net applications
- Developing Vb.net application and VB script macro in CATIA

- Client interaction that includes showing application demo and query clearance to the client regarding the application
- Provided hands-on support to teammates when they faced difficulties in VB.NET development

Design Engineer

DIVIJA TECHNOLOGY Chennai

Summary

- 3D Part scanning using optical 3D Blue light Scanning including Reverse Engineering and 2D & 3D inspection reports.
- 3D Blue Light Scanning by using GOM scanner.
- Also worked on onsite of WHIRLPOOL OF INDIA LTD in Puducherry.

CAD Customization Engineer (Intern)

SANDBOX AUTOMATION
CAD Customization – CATIA – VBA- Excel Automation. Coimbatore

EDUCATION

BE Mechanical Engineering, KGiSL Institute of Technology (2021), CGPA 7.60 Coimbatore
